PERSONAL PROFILE

As a Computer Engineering graduate with strong experience in backend programming, API development and integration, database design, and system architecture. Skilled in building, maintaining, and optimizing server-side applications using SQL-based databases, modern development frameworks, and version control systems. Experienced in troubleshooting, debugging, performance optimization, and technical documentation through academic and personal projects. Proven ability to collaborate in cross-functional teams, support application operations, and deliver reliable, scalable, and efficient technical solutions aligned with business requirements.

SKILLS

Technical : Java, JavaScript, Bun, Typescript, PHP, Python, C/C++, Laravel, Angular, HTML, CSS, MySQL, PostgreSQL, Oracle, Git, VS Code, Google Colab, Looker Studio, Google Data Studio, Microsoft Excel, PowerPoint, Word, Figma, Adobe Premiere, Blender.

Languages : Indonesian, English.

EXPERIENCE

Backend Engineer BNI

November 2025 – Present

Worked as a Backend Developer Intern at Bank Negara Indonesia (BNI), developing and maintaining banking backend services, applying clean architecture, optimizing database performance, and ensuring secure, reliable transaction processing within an enterprise financial system.

Software Engineer Intern Momofin

July 2025 – November 2025

Contributed to RESTful API development for digital document and e-stamp services, focusing on optimizing SQL queries and enhancing system performance using Docker and CI/CD tools.

Machine Learning Instructor (Freelance)

April 2025 - Present

Taught machine learning to individuals and small groups, covering data preprocessing, model training, and evaluation. Guided students in building and deploying models for real-world use.

LICENSE AND CERTIFICATION

AWS Cloud Foundations & Best Practices

September - October 2025

Proficient in Generative AI Essentials on AWS, AWS Security Essentials, and AWS Well-Architected Best Practices, with solid understanding of cloud-based generative AI, core cloud security principles, and best practices for building reliable, scalable, and secure AWS architectures.

Fundamental Course Software Engineering By Dicoding

July 2024

Skilled in designing intuitive user interfaces for basic websites, ensuring an enhanced user experience.

Independent Study DA&SE By RevoU With Kampus Merdeka 2024

February 2024 - June 2024

Data Analytics & Software Engineering

Responsible for transforming complex data into clear, interactive dashboards using Looker Studio and developing an internal company website to display sales data with responsive, interactive visualizations across devices.

EDUCATION

Gunadarma University - Depok

Bachelor of Computer Engineering - GPA :3.7

2021 - 2025

Machine Learning Course

August 2024 - February 2025

Studying machine learning with a focus on data analysis, model training, and evaluation. Gaining practical experience using ML tools to solve real-world problems.

Website Development Course

August 2021 –August 2024

Currently learning Golang for backend development and MySQL for database management and optimization.
